c64

<https://0x8.ch/HackersCardgame12>

Inventor: **xxxxx**
Assembler Coding...
https://media.ccc.de/V/25c3-2874-en-the_ultimate_commodore_64_talk

Even better:
https://media.ccc.de/V/33c3-8029-the_ultimate_game_boy_talk

Calling it "Ultimate Talk" is ultimately correct, WOW really fu*** great work

To learn Assembler and Computer Architecture the easy and funny way... with smooth SID-like sound :)
but in ~1995 they already listed 14 year old kids that bought assembler books.

Inventor: **Alan Kay** **Year: ~1993**
The inventor of the programming language Smalltalk was the first who used objects in software development. But Gutenberg and the letters of his printing presses was another example of templates. A class is a single template for part of a complete software, e.g. "Name, address, location, phone, ..." would be a template for a person in an object relational address database.

Simplification / standardization through "preprinted (software) templates", so in **cyberwar** (Electronical / Psychological Warfare) you would recognize the general behavior of the class or the design pattern (dp4) that makes it much easier to defend yourself against such attacks.

CLASS (Programming)

pituitary gland or hypophysis

b2

<https://0x8.ch/HackersCardgame12>

Inventor: **God** **Year: B.C.**
In vertebrate anatomy, the pituitary gland, or hypophysis, is an endocrine gland about the size of a pea and weighing 0.5 grams (0.018 oz) in humans. It is a protrusion off the bottom of the hypothalamus at the base of the brain.

Hormones secreted from the pituitary gland help to control growth, blood pressure, energy management, all functions of the sex organs, thyroid glands and metabolism as well as some aspects of pregnancy, childbirth, breastfeeding, water/salt concentration at the kidneys, temperature regulation and pain relief.

EEG / FLASH QFIRE?

b4

<https://0x8.ch/HackersCardgame12>

Inventor: **Satan** **Year: ~1900?**
I did not find any image from such a device. In Psychiatric Königsfelden (P4) there is an EEG installation. They measure your EEG with electrodes and in the same time it produces flashlights with a stroboscope. **The flashlight cause peeks on the EEG?** Unsure if that was "service" of the mental institution and they just tried to find out my perceptual threshold. The problem was that someone used this scene on the street or in my car and also flashed me, that **revictimized the scene in the Mental Institution and made me massive paranoid.** I don't know if psychological terror on the street was intentional or if this was that just that eg the CIA stole the data and abused it against me. Question would be, what could one do with massive blade-server && IEEE1588, eg. t1 card and a techno-party where many young people go to.

AMYGOALA

b1

<https://0x8.ch/HackersCardgame12>

Inventor: **God** **Year: B.C.**
The amygdala also corpus amygdaloideum; Latin, from Greek ἀμυγδαλή, is one of two almond-shaped groups of nuclei located deep and medially within the temporal lobes of the brain in complex vertebrates, including humans. Shown in research to perform a primary role in the **processing of memory**, decision-making, and **emotional reactions**, the amygdalae are considered part of the limbic system, **NOT VERIFIED BY ME SO FAR!!!**

Development / processing of anxiety, fear and anger, "fight or flight" - understanding or manipulating reaction, "rage", possibly

UINTRAGE COMPUTING

IBM Mass Storage System 3850 (80ies)

ibm1

<https://0x8.ch/HackersCardgame12>

Inventor: **xxxxx** **Year: ~????**
...meanwhile Willi is having a yellow honey
If one would find the older people that bought eg. an IBM System 3850 in the early days of modern computing, we could maybe find out who did all this bad things that happens in the world today. Psychological Profile of such a person would match to rich people and therefor maybe also not the nicest people. This would only be the first guess. If I would be rich I would give all my money to save the world, since there are still many problems on this world i bet I am not completely wrong with my first guess.

Could we find out who bought this sort of mass storage or other expensive? computer equipment in the old days???
Edwin Black: IBM had a "maybe" a few...
