

Crypto Beginners-Toolkit

Crypto Beginners Toolkit

dc10

Inventor: **Satan**

Year: ~????

You can do easy for example create a ROT13 encryption, that of course can be broken in seconds, but to begin with crypto it's maybe a good exercise, then continue maybe with Vigenère cipher, and then p-boxes and s-boxes.

Be careful, if you begin with crypto eg your local military would like to own you and to prevent that you don't join the crypto-anarchy movement.

Work in pairs of at least 2 people, if they want to put you in mental institution to erase your brain you have better chances to prevent that.

I don't have a lot of time *INSERT: since they target me permanently* <- psychological warfare but if you have time it's quite easy to write something to encrypt and decrypt rot13, alphabet has 26 letters, so if you double-rot13 you have again the original...

Weed

c2

Inventor: **God**

Year: -100k

Releases serotonin / dopamine, the unfiltered smoke is bad for the lungs, the arteries... It is currently an illegal self-medication. From medical point of view without consulting a doctor it is not the best idea to smoke weed. Because of the sedation the processing of consolidation of the things experienced in his live is skipped, which will lead later into a psychosis and reduces the resilience of the individual. Often used to obfuscate illegal human experiments, for example t* cards. Can have a pain-relieving effect. Maybe helps against Epilepsy. Consumers show more ignorance that can help in some stress situations (but consider m49, m50 card). Additional the person that smokes weed seems to focus more on the non-verbal communication.

Design Psychology...

...or how the CIA could install the "programm agent" in the head of our "lovely" 1950s

dc8

Year: ~????

Inventor: **Satan**

So first the Agent in Matrix (Agent Smith) is somehow to young and to make the Agents feel superior such institutions have specific design, so possibly one would find out quite fast if a company is payed by the NSA/CIA just by looking at the design of the building and the design of its rooms...

not yet 100% sure about that....

COEXIST

"Love and compassion are necessities, not luxuries. Without them humanity cannot survive."

-Dalai Lama

gfp1

Inventor: **comparative religion sciences**

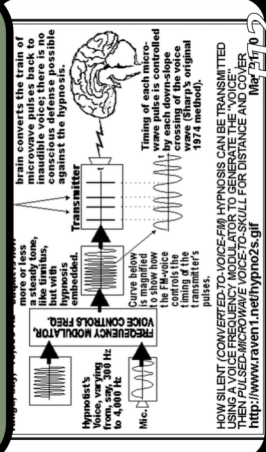

Evil Systems, or better some few people in big systems like the CIA and some older people tend to separate society eg. left-wing from right-wing or christianity from islam from judaism, white from black, ... they try to make them fight each other while those who made them fight take their goods, Maybe we should warn the younger people with the message: **COEXIST**. As a christian for example learned a lot from Islamic or Jewish culture. Notice for many people today science is also some sort of religion.

Those people who make profit out of wars would maybe want to destroy this card so that they can play on their dirty game. I please all religions to distribute and protect this sort of COEXIST cards.

Microwave Hearing (Frey Effect)

c2

Inventor: **Allan H. Frey (Cornell Uni)**

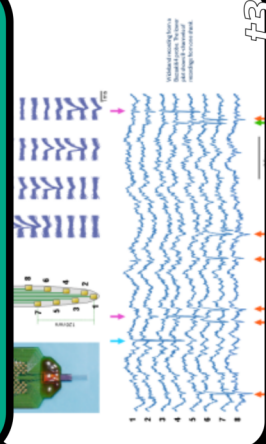

Year: ~1961

"He Hears non-existent voices, hahaha", invisible communication channels, pulsed microwaves received directly by the cochlea. The exact frequency found by scanning through the possible frequencies, if the victim puts his hand to his ear ("tinnitus"); Automatic Behavior Recognition. Was 30 Years not patented until 1989 under US4877027. Technically it would have been possible to do this maybe already with electron tubes (~ 1900). Psychological Perspective: people that abuse such technology would keep that secret and previously labeled as a "Schizophrenic" the victim is completely defenseless and it is likely they induced suicide or amok in combination with e.g. a loop recorder, see also c02 Card, the perpetrators often caused permanent damage in the psyche of their victims; PTSD (#Verdingkinder / #Schwabenkinder / #Slaves)

NeuroNexus Implants

t3

Inventor: **Jose Manuel Rodriguez Delgado**

Year: ~1950

Originally developed by Delgado, possibly been enhanced "in secrecy" since 70 Years, placed directly in the brain, and with software like OpenBCI and maybe Deep Learning algorithms possibly recognizes even detail thoughts. (see Neuralink, Elon Musk, HoneyPot) No matter how good the encryption would be, if wires are made out of metallic wires all such devices would be vulnerable to side-channel attacks [f = 1/n] if geometry if the wires are know and there is a transmitting device with enough power nearby. (unsure if t25 or t26 or both cards) I tweeted to Elon Musk asking what he is going to do about this vulnerability, but he did not answer so far. Maybe just HoneyPot for older technologies, and maybe Hashtags are filtered.
