to quote @ioerror: "and those things seem limited either by budgets or simply by their time" so you have as a "poor" swiss guy no chance with winning like pam usb that was broken when i was in mental institution 2017, and 2020 i could partitially fix it, the game with money, but you can do custom work, Year: ~? but not yet the one-time-pad.

https://github.com/braindef/pam_usb/

does what they want. Or to say it in the words of a interpretation is that you have had already some cases in real curts and you found out that it does not matter if you did right or wrong, the older generation German-speaking friend: "Recht und Gerechtigkeit Anarchy has also different menaings, naar Schiihe"

anguage Level Detection

thre Antwort ist bedeutungslos. Wi wissen nichts. Wir registrieren, perechnen und ziehen unsere Schlussfolgerungen.

Inventor: xxxxx

There are algorithms to find out about the language level of the person who wrote that text. For example communication above a specific language if the text was written by a second grade student or sor. It seems that satan took this algorithm and used it as filter algorithm that t1 or t12 card. This would have effect that especially intelligent people would be handicaped in "unseen university" (Terry Pratchett) while the less educated people would have no problems to communicate with each other. Unsure if bug or feature (preventing m40 card). But in a fair world all or none should have that filter. But it definitively wastes our time and Year: ~??? level. For example for filtering communi makes us crazy and low self-esteem.

Bijektivitaet REVERSIBILITY

Die Funktion $f \colon \mathbb{R} o \mathbb{R}, x \mapsto x + a$ ist bijektiv mit der

REVERSIBILITY Total losse his mistes to fract him count, he logels to play this God
