INDUCED BURNOUT — bo1

Inventor: xxxxx   Year: ~???

If a whitehat hacker discvers that the company he works in (for example in switzerland) is maybe owned by nsa/cia and would begin to tweet about that one would maybe ask, why the whistleblower was killed after tweeting that. So those people would attack him with different methods, eg. with declaring him Schizophrenic or with things like induced Occupational burnout. The chief maybe says stupid things like, "we only want to *help* marc" lets put him in mental institution that he gets better. but as we know already, a mental institution makes it much much more worse.

To prevent that the remove whitehat hackers and whistleblowers or even kill them tell the people about this sort of nsa / cia infiltration and terrorism.

WAIT TIME — smoke1

Inventor: ~???   Year: ~???

And if the kid / victim that was abused (abuse = obfuscation for human experiments) and transformed in a bot and he would be to fast for the people who did this to him / her they would send him to smoke a cigaret (Stimulus-Reaction-Habit or Electronic Harassment) so the can change things or fake the protocol or steal prove.

If one smokes, its possibly also a victim of such illegal human experiments. But it is also possible that one of the offreders smoke to obfuscate his role as culprit (a14 Card)

Behavioral "Sciences": They enable the pain implant in the frontal lobe, and if you smoked they disable it, so you smoke.
